

PR / CASEVAC

VIGILINT's Rescue Specialist Teams (RST) deliver elite Personnel Recovery (PR) and and Casualty Evacuation (CASEVAC) capabilities in support of both civilian and government operations, executing day or night missions across any environment.

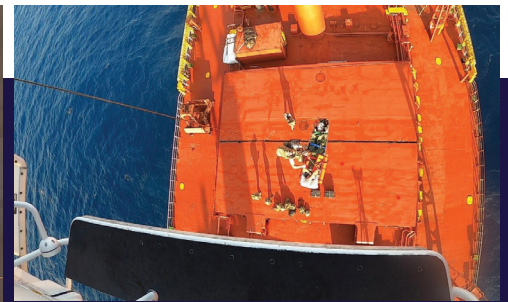

Fully platform agnostic, RSTs seamlessly integrate with any air or ground platform provided by the client.

Each RST member is Special Operations Medic qualified with advanced certifications and extensive field experience.

RST capabilities include hoist and high-angle rescue, vehicle, debris, collapsed structure, and confined-space extractions, as well as water and swift-water rescue operations.

RSTs stand mission-ready to recover, treat, and transport critically injured patients around the world.
