- Dermatological
- Gastrointestinal
- First Aid Supplies
- Urologic
- Eye, Ear, Nose & Throat
- Anti Inflammatories
- Analgesics
- Sleep Adjunct

TMAP PROGRAM HOW IT WORKS.

1 CONSULTATION

Members meet with a **VIGILINT** Provider to review their medical history and for prescription of the member's Travel Medical Kit (TMK).

2 RECEIVE TMK

The TMK typically includes 34 prescription, non-prescription, and first aid supplies that are shipped directly to the member.

3 TRAVEL

With their TMK in hand, off the member goes on their trip.

4 GET SUPPORT ABROAD

While traveling, in the event of illness or injury, contact **VIGILINT**'s 24/7 Medical Operations Center. Within 30 seconds of calling, members are connected with an emergency physician who will assess the patient's situation and instruct the member on what medications to use from their TMK to treat the illness. If deemed necessary, a specialist would provide further consultation.

5 TRANSPORTATION (IF NEEDED)

If symptoms worsen, Medical Operations will manage medical evacuation to the patient's hospital of choice in their home country.
